Experience

Front-End Developer at Remote digital

Remote
Jan 2025 - Present

- Developed and maintained responsive user interfaces using Next.js, TypeScript, and Tailwind CSS, improving usability across both the eCommerce and ERP platforms.
- Integrated front-end components with GraphQL APIs via Apollo Client, enabling efficient data fetching and state management for inventory, orders, and product catalogs.
- Collaborated with designers and backend developers to deliver user-centric features such as advanced filtering, product customization, and order tracking.
- Ensured accessibility and cross-browser compatibility, and implemented UI improvements that led to a 25%+ increase in user engagement and smoother admin workflows.
- Built dynamic and accessible data visualizations using Recharts and ShadCN, enabling users to analyze sales trends, and inventory stats through interactive charts and clean dashboards.

Freelance Projects

Local Streetwear Online Store - OT Hauls

Mar 2025

- Built and deployed a modern eCommerce website for a local streetwear brand with real-time product management, filtering, and cart features.
- Integrated Supabase for authentication, real-time database updates, and storage; implemented notifications using Supabase Realtime for order and inventory events.
- Created a clean, responsive UI using ShadCN components and Tailwind CSS, with smooth, engaging transitions via Framer Motion.
- Supported guest checkout flow to reduce friction for first-time buyers, increasing conversion potential.
- Deployed on Vercel with optimized performance.

Pop up Coffee Shop Website - Straybean

- Developed a sleek promotional website for a mobile coffee cart with immersive 3D graphics using Three.js and interactive event tracking to boost user engagement.
- Built an internal admin dashboard featuring a dynamic calendar (React Full Calendar) and modular CRUD functionality using a reusable TanStack Table + ShadCN UI stack.
- Integrated Supabase for authentication and event management; deployed on Vercel with a custom GoDaddy domain and real-time database capabilities.
